I am a full stack web developer and a student with a solid foundation in front-end development. Currently, I am expanding my skills in backend development using Express.js and MongoDB. I have developed several projects, including a basic to-do list application that allows users to add, update, delete, and view tasks. I am pursuing a Bachelor's in Information Technology at MSNUAM. I am now seeking an internship opportunity where I can further develop my skills and grow as a full stack engineer.

Projects

Here are some of my projects

- I have built a photography portfolio website using React, Sass, and Framer Motion. I have built several to-do list applications using vanilla JavaScript, React with local storage, and full stack with React, Express, and MongoDB.
- I have built some static websites using pure HTML, CSS, and JavaScript.
- I have also built a shoes website using Tailwind CSS.
- I have also built a music player app by following through a tutorial.

Deployment Links

- Shoe website: <https://servis-clone.netlify.app>
- Music player: <https://musicaly-react.netlify.app>

Education

Government Bukhari Public High School

2017 - 2019

- Computer Science 883/1100

Government Millat College

2019 - 2021

- ICS 1082/1100

Muhammad Nawaz Sharif University

2021 - 2025

- Bachelor's of Information Technology
- GPA: 3.70

Skills

Frontend:

- HTML, CSS, and JavaScript
- Basic understanding of React (states, props, redux toolkit, context API)
- Basic knowledge of SASS and Tailwindcss
- Had experience with some other libraries such as Framer Motion.

Backend:

- Beginner at the backend but has the basic knowledge of express.js and MongoDB
- Understanding of RESTful APIs
- Good command over SQL databases too
- Can build basic CRUD REST APIs
