

Abdul Ahad

Software Engineer

Profile

Highly motivated IT student with a strong foundation in computer science, including core subjects such as Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), and Database Management. Proficient in web development technologies like JavaScript, React.js, Next.js and Node.js, with a passion for solving complex problems and building efficient, scalable applications. Seeking an opportunity to join a dynamic team and grow as a software engineer while contributing to impactful projects.

Education

Bachelor's in Information Technology

Muhammad Nawaz Sharif University of Agriculture, Multan 2021 - 2025

CGPA: 3.89/4.00

Projects

Final Year Project - Joblix

(Next.js, Node.js, Express.js, PrismaORM, NeonDB, PostgreSQL, Google gemini API, React Query, TailwindCSS, ShadcnUI)

- Led the full-stack development of the project, including designing the backend architecture and selecting the appropriate tech stack and tools.
- Implemented secure authentication flows using JWT tokens, Google OAuth, email verification (via Mailgun & custom .tech DNS), OTP-based login, and password reset functionalities.
- Designed and developed backend APIs, integrating them seamlessly into the frontend using Next.js server components and React Query.
- Optimized the user interface with TailwindCSS and ShadcnUI for a responsive and modern design.

Airbnb Clone

(React.js, Node.js, Express.js, TailwindCSS, MongoDB)

- Built an Airbnb-inspired web application allowing users to browse and list properties.
- Implemented image upload APIs, allowing users to upload images either directly from their device (using Multer) or via a URL, with Cloudinary handling image storage.
- Implemented user authentication with JWT and secured backend routes through middleware checks.
